

## Day 1 Offer Script (White-Labeled)

**Subject:** Want to unlock global traffic this week?

**Preheader:** AI-powered translation that ranks on Google — and converts more customers.

---

**Body:**

Hey [Client First Name],

We've added a powerful new capability to help you reach more customers globally — without any redesign or development work.

It's an **AI-powered multilingual upgrade** that makes your site available in other languages — like Spanish, French, or German — in a way that search engines can fully index.

Unlike tools like Google Translate, this system is **context-aware**, maintains your brand tone, and uses real SEO structures — so every page can start ranking and converting in new markets.

Here's what's included:

- Full-site translation (AI-powered and editable)
- Clean, SEO-friendly URLs (like [yoursite.com/es/](#))
- Automatic updates and sync with your content
- Glossary and tone control for brand accuracy
- Fast loading, no-code implementation

We can have a translated version of your site **live in 2–3 days** — and you can start testing traffic from high-potential regions immediately.

Let me know if you'd like to get started or learn more about it.
